Risk Assessment – Exposure to COVID-19 in the workplace

Centre name: **ALL Centres – UK**

Assessment carried out by: **Keith Lee**

Date of next review: **After UK Governmental
Department Announcement**

Date assessment was carried out: **12th May 2020**

COVID -19 (Coronavirus)

COVID-19 affects the lungs and airways of those infected and are primarily spread through respiratory droplets, which mean to become infected, people generally must be within six feet of someone who is contagious and come into contact with these droplets. It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or their eyes.

Symptoms of COVID-19 appear usually within two to 14 days after exposure and include fever, cough, runny nose and difficulty breathing. Generally, these infections can cause more severe symptoms in people with weakened immune systems, older people, and those with long-term conditions like diabetes, cancer and chronic lung disease.

What are the hazards?	Who might be harmed and how?	What are you already doing to control the risks?	What further action do you need to take to control the risks?	Who needs to carry out the action?	When is the action needed by?	Done
Potential Exposure to COVID – 19 (Coronavirus):	Employees, Customers, Visitors, Members of the public, Contractors.	Use guidance from World Health Organization and NHS to ensure the risk assessment is following the latest advice. Follow UK Government guidelines in reducing the likelihood of exposure. Cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze.	Ensure the 'Polite Notice' issued on the 10th March informing customers not to enter the premises if suffering from coronavirus symptoms, is displayed on the reception entrance doors (Removed for updated posters after review)	Centre Manager	13-May-20	13-May-20
